

SKYHUB
.aero

About Skyhub

- Platform for the 3 main jobs in aviation
 - Pilot
 - Cabin Crew
 - Air Traffic Controller
- Provide all the information you need to know in short articles
- Includes a airline directory with key company facts like airline fleet
- Includes a job market for all branches where companies can post their job offers and users can apply

Why Skyhub?

- Modern and simple design
- Easy to use and reliable web structure
- Responsive design to promote accessibility for all users
- Fast and straight to the point

Airline Directory - Airline Insights

- Over 1000 airlines worldwide
- Distinguish between various airline types and regions
- Search filters but also inviting the user to just browse through the companies
- Facts like:
 - Founding
 - Headquarter
 - Employees
 - Aircraft Fleet
 - Company Benefits
- Salary
 - salary information for aircrew provided by employees of the airline or the airline itself

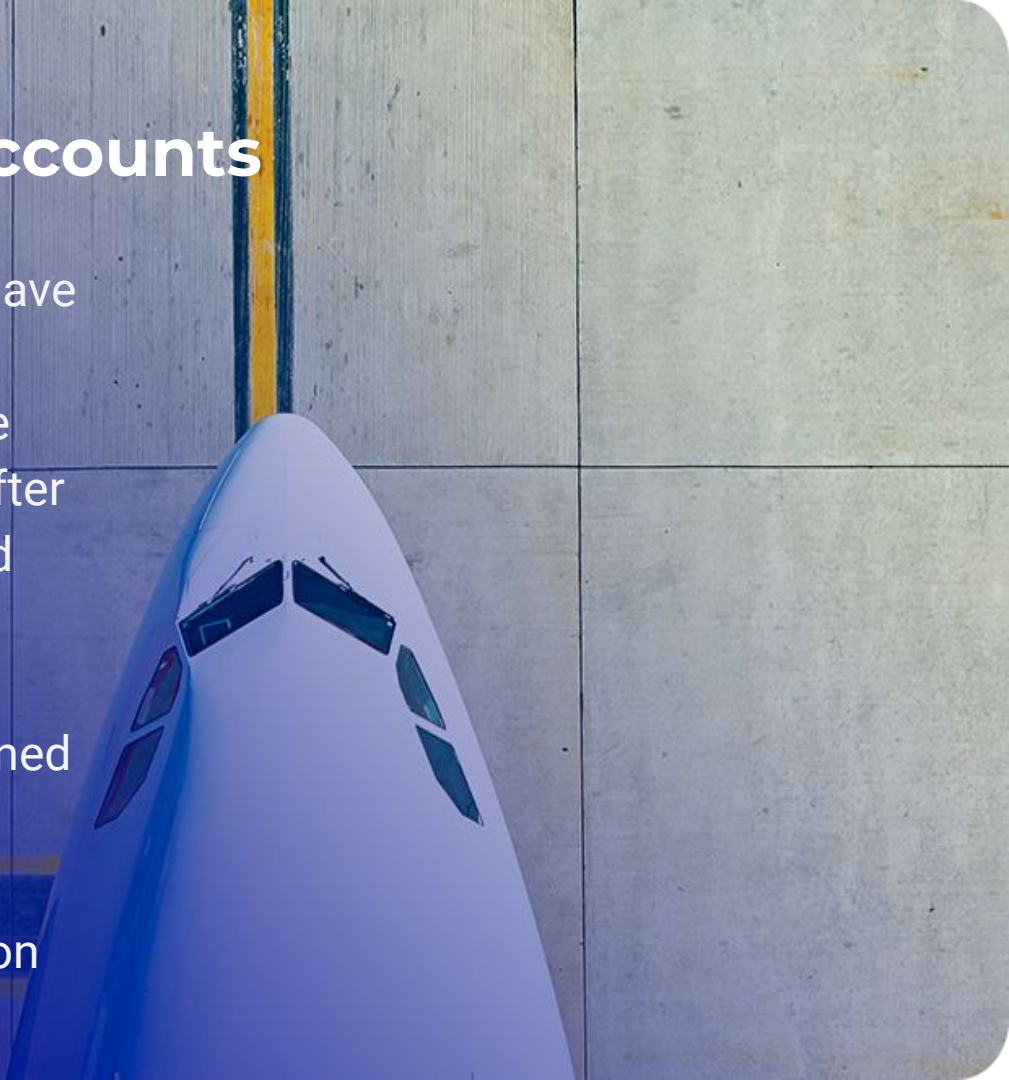

-> all those insight pages can be update by website users anonymously and have to be approved via the admin panel

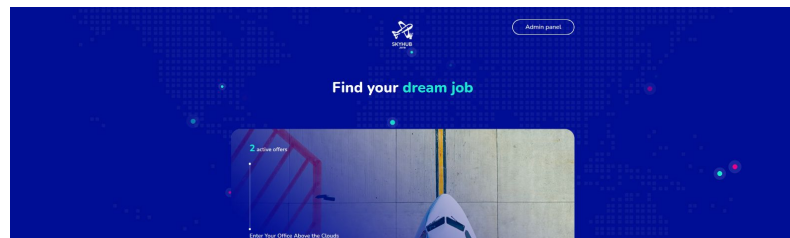

Job Market

- Airlines or Recruitment companies will have the possibility to post job advertisement
- They enter all required information which will be displayed to the visitors in a clean layout
- Visitors get redirected to the companies own recruitment portal if they decide to apply

Airline / Recruitment Accounts

- Airlines / recruitment companies have to register using a simple form
- Newly created accounts have to be verified through the admin panel after account details have been checked
- Verified accounts are then able to directly post job offers
- Airline accounts can be also assigned to their own “airline insight” page, being then able to directly update company facts or salary information

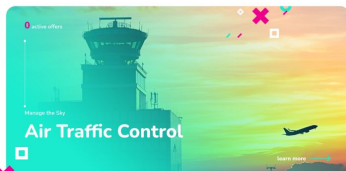

Find your **dream job**

Not enough? We've got **more!**

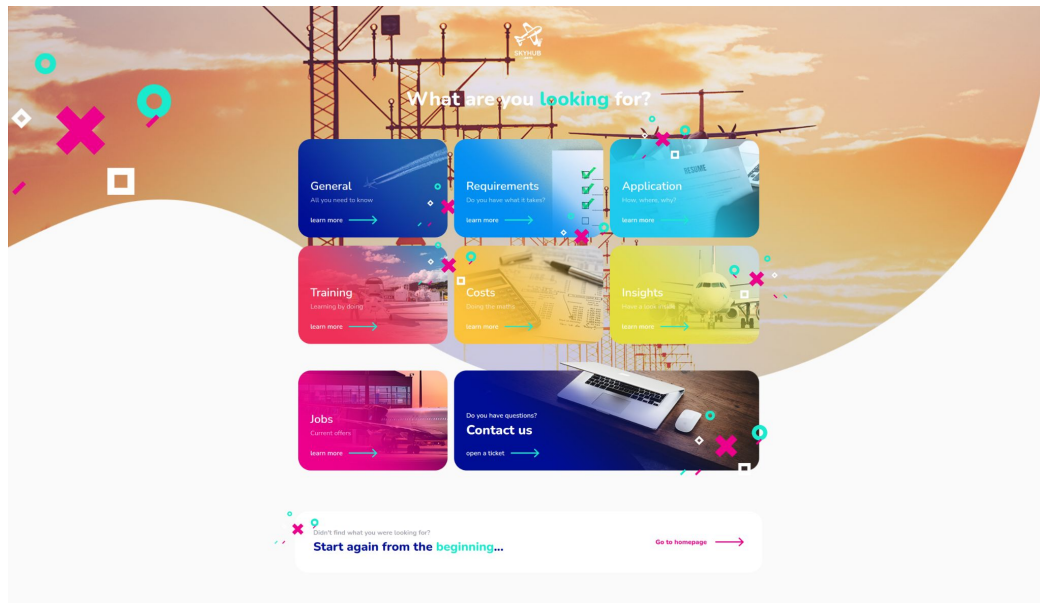

...and even **more!**

Why we need you

- Reworking a second version of Skyhub
- More maintainable web platform
- Giving a fresh look to the inner workings of Skyhub

Technologies

What we have in place	What we want from you
PHP / Laravel / Blade Sass / Bootstrap Some JS MySQL	Frontend: React / Next.js 13 Backend: Node / Express Sass, maybe Tailwind MySQL
Tools used	
GitHub GitHub Project Management Docker for Deployments	

Try it out!

<https://skyhub.staging.d-a-pfeiffer.info>

Are you in?

Thank you for your time!
